

C02 / N20 PUMP PROCESS

A PLC is included in this panel to pilot the pump motor and to manage the valves and sensors.

Parameters :

- Sensors range
- Timers
- Process
- Parameters

Display :

- Output valve
- Global synoptic
- Pump motor, valve states
- Temperature
- Pressure
- Faults

Inputs :

- Valve switches
- Pressure sensor
- Temperature sensor
- PSH
- Remote start

Outputs :

- Pump motor
- Tank valve
- Return valve
- Output valve
- 4-20mA for electronic inverter
