

STOPFILL CRYO

TO STOP WITH LOW TEMPERATURE DETECTION

Connect a temperature sensor and "StopfillCryo" pilots the cryogenic valve.

- Stopfill Cryo opens the valve
- Stopfill Cryo detects low temperature on a vent
- Stopfill Cryo detects a time out

Parameters :

- Value of the stop temperature
- Timers

Stopfill provides :

- 24Vdc to pilot the product valve
- 24Vdc to pilot the vent valve

Stopfill receives :

- PT100 for the temperature on the vent line

Stopfill shows on the screen :

- Temperature on vent
- Timers
- State of valves
