

# PLC & PROCESS

## GAS EQUIPMENTS

# STOPRAMP

## Functions :

### Filling process :

- Cylinder temperature is calculated by the Stopramp
- With this temperature, we also calculate the end pressure
- You can have up to two final pressure

### Regulation valve :

- Manage the regulation valve opening to get the good pressure for filling

### Sensor connected :

- Main pressure line 4/20 mA
- Vacuum pressure 4/20 mA
- Ambient temperature PT100(provided with system)

## Characteristics :

- Operator interface by touch screen
- Power supply 230 VAC
- Outputs for valves 24VDC 0.5A
- Sensors 4/20 mA
- Compatibility for O<sub>2</sub>, Ar, N<sub>2</sub>, He
- PSI/Bar
- F°/C°
- Stainless Steel cabinet

## Options:

- Remote control access
- Independent vacuum pump process
- Connection with PLC E-connect
